

# ASG-Manager Products™ Enhancement Summary

## Version 2.5.2

August 21, 2002  
MPR1000-252

This document announces the availability of ASG-Manager Products (herein called Manager Products) Version 2.5.2 and contains these topics:

<b>About Version 2.5.2</b> .....	<b>1</b>
Documentation Updates .....	2
<b>Migration Information</b> .....	<b>2</b>
Migrating from Manager Products Version 2.5.0 or 2.5.1 .....	2
Migrating from Manager Products Prior to Version 2.5.0 .....	4
<b>DB2 Version 7.0 Universal Database (UDB) Export and Import</b> .....	<b>4</b>
<b>Miscellaneous Software Corrections</b> .....	<b>5</b>

## About Version 2.5.2

Version 2.5.2 is available in OS environments (all currently supported Versions of MVS, OS/390, and z/OS) only, and is essentially a Fix Level Version of Manager Products. This release also contains new functionality to support DB2 Version 7.0.

These products are included with this release:

<b>Product</b>	<b>Version</b>
ASG-ControlManager	2.5.2
ASG-DataManager	2.5.2
ASG-DesignManager	1.4.3
ASG-DictionaryManager	2.5.2
ASG-MethodManager	2.5.2
ASG-ManagerView	2.5.1
ASG-Web Enabler	2.5.1

The installation package consists of:

- A tape or cartridge for the host components
- A compact disc (CD) containing ManagerView and/or Web Enabler
- A CD containing the Manager Products documentation.

The migration path to Version 2.5.2 differs depending on the Version of Manager Products you are currently using. Please read ["Migration Information" on page 2](#) before proceeding further.

## **Documentation Updates**

These publications include updates for Version 2.5.2:

<b>Publication Title</b>	<b>Publication Number</b>
<i>ASG-Manager Products Relational Technology Support: DB2</i>	MPR0200-252-RELDB
<i>ASG-MethodManager Installationsbeschreibung</i>	MMR0300-252-DEU

## **Migration Information**

### **Migrating from Manager Products Version 2.5.0 or 2.5.1**

Users migrating from Version 2.5.0 or 2.5.1 need only perform a limited migration process. Depending on the products used and functionality required, you need to install a subset of the datasets supplied on the release cartridge. [Table 1 on page 3](#) contains details of all datasets updated for Version 2.5.2.

You do *not* need to migrate your existing 2.5.0 or 2.5.1 MPAIDs and repositories. These resources can be accessed without change by Version 2.5.2.

Repositories and MPAIDs built using Version 2.5.2 will be created with a Version/Release number of 2.5.0.0, that is, the same as when using 2.5.0 or 2.5.1. Users migrating from 2.5.0 should also read the *ASG-Manager Product Enhancement Summary* Version 2.5.1 in conjunction with this document in order to obtain full details of the changes and enhancements between Version 2.5.0 and 2.5.2.

**Table 1 • Host Datasets Updated for Manager Products Version 2.5.2**

<b>Data Set Name</b>	<b>Product Usage</b>	<b>Installation Requirement/Change Description</b>
MP.COM.UNLOAD	All Products	Must be installed by all users. Contains fixes/updates to Manager Products MPAID Command members and Corporate Executives. MPAID space requirement is 8700 1K blocks.
MP.CORP	All Products	Optional installation. Contains new and amended Corporate Executives used with DB2 support, Web Enabler, and ManagerView. When installed, users must re-apply their own customization changes.
MP.LOADLIB	All Products	Must be installed by all users. Contains fixes/updates to Manager Products program code. When installed, users must re-apply their own customization changes.
MP.MMR.ADMIN	MethodManager	Should be installed by MethodManager users. Changes are contained in statuses ADMIN2520 (contains fixes) and MDRIM2520 (updated DB2 member-type definitions).
MP.MMR.UNLOAD	MethodManager	Should be installed by MethodManager users who use untailed DB2 member-type definitions. Contains changes to MPAID Command members and Corporate Executives. MPAID space requirement is 24000 1K blocks.
MP.MMRG.RIM	MethodManager (German Version)	Should be installed by MethodManager users who use the DB2 member-type definitions.
MP.RIM.UNLOAD	MethodManager (German Version)	Should be installed by MethodManager users who use untailed DB2 member-type definitions.
MP.SOURCE	All Products	Optional installation. Contains updated member DB2VIEW5 for users of DB2 Version 5.0, DB2VIEW6 for DB2 Version 6.0, and DB2VIEW7 for DB2 Version 7.0.

## Migrating from Manager Products Prior to Version 2.5.0

The full migration process *must* be performed when migrating from a release prior to Version 2.5.0. This process is described in the *ASG-Manager Products Migration Notice* or *ASG-MethodManager Migration Notice* which are issued with Version 2.5.0 and later but should be carried out using the Version 2.5.2 datasets and any additional documentation supplied for Version 2.5.1 and 2.5.2.

## DB2 Version 7.0 Universal Database (UDB) Export and Import

These member types have been added or enhanced for new clauses:

- DB2-COLLECTION
- DB2-DATABASE
- DB2-DMS
- DB2-FUNCTION (new to separate functions from procedures)
- DB2-INDEX
- DB2-PACKAGE
- DB2-PLAN
- DB2-PRIVILEGE
- DB2-PROCEDURE
- DB2-AUXTABLE (new to separate Auxiliary Table from Table)
- DB2-TEMPTABLE (new to separate Temporary Table from Table)
- DB2-TABLE
- DB2-TBSPACE
- DB2-TRIGGER
- DB2-VIEW

**Note:** \_\_\_\_\_

The new member-types DB2-FUNCTION, DB2-AUXTABLE, and DB2-TEMPTABLE are only included with UDS-definitions in the MMR-specific files and formats.

---

Due to the additional attributes in the DB2 member types a re-encode is required. To achieve this issue a SAVE ALL command in your Manager Products Version 2.5.1 environment and then issue a RESTORE ALL command in your new Manager Products Version 2.5.2 repository.

The generated SQL statements are enhanced for this feature.

These member types include import enhancements:

- DB2-DATABASE
- DB2-INDEX
- DB2-PACKAGE
- DB2-PLAN
- DB2-TABLE
- DB2-TBSPACE
- DB2-TRIGGER
- DB2-VIEW

Also, MethodManager (MMR) includes enhancements for AUPDATE skeletons.

## **Miscellaneous Software Corrections**

All official software fixes issued during the currency of Version 2.5.1. have been incorporated in Version 2.5.2. These include fixes 1 through 43.
