

ASG-Report.Web[™] License Key

Version 3.0

December 6, 2002
1923500-30

Monarch License Key

The Monarch installation process requires you to enter a registration key. You will find this registration key in your copy of Monarch Version 6.0.

ASG-Report.Web License Key

ASG-Report.Web setup prompts you to specify the location of the RWLICENSE.INI file (usually drive A:\). If you do not supply the RWLICENSE.INI file, setup installs a default 45-day trial license file, or uses the one already installed on your system (if you are upgrading ASG-Report.Web).

Note: _____

When your license expires, you may download an emergency license file from the ASG Intelligent Support Portal (ISP) at <http://www.asg.com/support/support.asp>. The emergency license allows you to temporarily continue operating Report.Web while ASG renews and delivers your updated license file. It is only valid for approximately one to two weeks.
