

# ASG-Tracer<sup>®</sup> Enhancement Summary

## Version 7.4.0

February 14, 2003  
TCR1000-74

This document includes these enhancements for ASG-Tracer Version 7.4 (herein called Tracer):

- All PTFs created since the last release of Tracer were applied to the source code.
- New APM authorization routine is incorporated in this release.

## PTFs Since Last Release

All PTFs created since the last release of Tracer were applied to the product source code. Also, ASG has reassembled and completely tested the product on all IBM operating systems up to and including z/OS Version 1.2.

## APM Authorization Routine

This release incorporates a new APM authorization routine. See the *ASG-Tracer User's Guide* for a description of the procedure to apply the new authorization codes.
