MSO CICS RDO Guidelines

These guidelines are designed to assist installation of MSO resources for CICS. The following RDO (Resource Definition Online) definitions are compatible with the storage protection attribute STGPROT=YES in the DFHSIT (System Initialization Table for the MSO region):

IBI-supplied PROGRAMS that are defined to CICS should specify EXECKEY(CICS).

The MSO/CICS TRANSACTION definition should specify TASKDATAKEY(USER).

For additional information, see the table on page 7-9 of the Multi-Session Option Installation and Technical Reference Guide Release 7.0 (DN1000966.1095)

Disclaimer

These are provided as guidelines only. Your particular site may have special considerations. For further assistance in customizing these definitions, please contact Information Builders.
