TM7963.1

ALERT!

MVS Installation Update: IBI SVC Is No Longer Supported

Some FOCUS facilities such as MSO, SU, and the IMS BMP require you to install the IBI Subsystem. In releases prior to 7.0.9, the SVC was shipped on the installation tape as the default. In 7.0.9 the IBI Subsystem became the default, but the SVC was supported

Important: FOCUS Version 7.0 Release 9 was the last release of FOCUS that supported the SVC. As of Version 7.1 the subsystem is required.

As described in Tech Memo 7940.1, *Subsystem: Installation Modification for FOCUS 7.0.1 Through 7.0.8R*, installing the subsystem no longer requires an IPL of MVS for MVS 5.2.

The FOCUS for S/390 OS/390 and MVS Installation Guide Version 7.1 (DN100994.1100) completely describes the steps for installing the IBI Subsystem:

The section *Step 10. Install the IBI Subsystem*, in Chapter 2, *Basic Installation Steps*, describes the installation of the IBI Subsystem.
