Rebuilding External Indexes Created Prior to FOCUS Version 7.0 Release 9

The mechanism for creating external indexes for FOCUS and FUSION data sources was enhanced in FOCUS Version 7.0 Release 9. Any index created in a release prior to FOCUS 7.0.9 is incompatible with later versions of FOCUS. Therefore, any customer upgrading to FOCUS Version 7.0.9 or above must rebuild all external indexes that were built prior to 7.0.9.

For detailed instructions about rebuilding external indexes, see the *FOCUS for S/390 Maintaining Databases* manual.
