Explanation: The specified input parameter or value in the PRILOG6 control cards is invalid.

Action: Correct the identified parameter and rerun the program.

Messages from the System-Dependent Component

Overview of Messages

PL6D01 | PL6D02

PL6D01 DDCARD FILE FAILED TO OPEN, USING DEFAULTS

Explanation: The input card file could not be opened.

Action: If the defaults are used, there are no input cards and this file is not required. The message can be ignored. The default values are CLOGLAYOUT=5 and FIELDS=(LIST).

If values other than the defaults are required, ensure that the file is available and rerun the job.

PL6D02 DDCLOGIN FILE FAILED TO OPEN - NO REPORTS

Explanation: The file containing the CLOG records did not open. No reports are printed.

Action: Ensure that the file is properly allocated and rerun the job.
