

LOGSIZE : Maximum Command Log Size

Parameter	Specify . . .	Minimum	Maximum	Default
<u>LOGSIZE</u>	the maximum blocksize for the sequential command log DD/LOG.	100	32 760	value of QBLKSIZE

This parameter controls the maximum block size for the sequential command log DD/LOG. The default value is identical to the value of the QBLKSIZE parameter. If dual or multiple command logging is used, this parameter is ignored.

Example:

The blocksize of the command log is 2,000 bytes.

```
ADARUN PROG=ADANUC,LOGSIZE=2000
```
