

TASKCTGY : Adabas Batch/TP Task Category Control

This parameter applies in BS2000 operating environments only.

Parameter	Specify ...	Possible Values	Default
TASKCTGY	the Adabas task category.	BATCH TP	BATCH

BS2000 TP (interactive processing) environments favor TP-processing tasks over batch tasks. By default, Adabas has batch status. You can use the TASKCTGY parameter to assign TP-processing priority to the Adabas nucleus.

Value	Meaning
BATCH	(default) The nucleus retains batch status.
TP	Issues a TINF macro to force the Adabas nucleus to TP status.

Example:

Force the nucleus to TP-processing status.

```
ADARUN PROG=ADANUC, TASKCTGY=TP
```
