

Transport Service Abend Codes

The following transport service abend codes are provided for debugging purposes.

- Abend Codes in a CICS Environment
- Abend Codes in a Com-plete Environment

Abend Codes in a CICS Environment

In the case of problems during execution, the transport service start-up routines may terminate with a CICS abend code, or with one of the following transport service specific abend codes:

Code	Description
CT00	Insufficient TWA size.
CT01	Missing parameters.
CT02	Invalid parameters.
CT03	Storage overflow when building dynamic parameter string.
CT04	CTPARAM does not contain a dynamic parameter string specification for the required function.

Note:

Natural terminates with abend code NT06 whenever a terminal WRITE is attempted in non-interactive mode.

Abend Codes in a Com-plete Environment

In the case of problems during execution, the transport service start-up routines may terminate with a Com-plete abend code, or with one of the following transport service specific abend codes:

Code	Description
1202	Missing parameters.
1203	Invalid parameters.
1204	Storage overflow when building dynamic parameter string.
1205	CTPARAM does not contain a dynamic parameter string specification for the required function.

Note:

Natural terminates with a Com-plete abend code ZWRnnnn whenever a terminal WRITE is attempted in non-interactive mode.
