

# Log Information Maintenance

This section contains the following topics:

- Log Data Maintenance Screen
- Displaying a Log Record
- Erasing a Log Record

## Log Data Maintenance Screen

The Log Information Maintenance function is used to display significant events that occurred while uploading and downloading addresses to/from the central directory. The type of events which are recorded here depends upon the log level you defined for the central directory. See *Administration Data Maintenance*.

To avoid excessive disk space usage, it is recommended that you occasionally purge obsolete log data especially if a log level greater than 0 is specified.

Command ==>
Enter-PF1---PF2---PF3---PF4---PF5---PF6---PF7---PF8---PF9---PF10--PF11--PF12---
      Help      Exit      Flip  -    +      Canc

```

### Date/Time of Log

Date and time log was created.

### Program

Program name in which the event occurred.

**Msg. Nr.**

Event message number.

**Log Message**

Description of event.

**Node Name**

Name of node on which event occurred.

**Erase up to**

You can enter a specific date and time to delete all log records created before the date you specify.

## Displaying a Log Record

To display extended information about a specific log record, you mark the record you want with DI in the Cmd column and press ENTER. As a result, a screen similar to the one below is displayed.

```

15:16                * * * C O N - N E C T 3 * * *                14/02/94

  Mode: I Node: DALLAS   CD-ID: DAEFCOC Cabinet: LS

Command ===>
Enter-PF1---PF2---PF3---PF4---PF5---PF6---PF7---PF8---PF9---PF10--PF11--PF12---
      Help      Exit  Next      Flip                                Canc

```

The information which is displayed here can be used by the Software AG staff if additional information is required.

If you have selected to display more than one log record, you can press PF4 to display the next record.

## Erasing a Log Record

To erase a log record, you mark the record you want with ER in the Cmd column and press ENTER. A window is displayed in which you are asked to confirm the deletion. Enter *Y* and press ENTER again.
