

Z-ERA74

This chapter covers the following topics:

- Description
 - Parameters
 - Return Codes
 - Subprograms
-

Description

Delete an external node which uses either the transport service or the spool file. This subprogram can only be used by a system administrator or supervisor.

This subprogram deletes the specified external node immediately. When the external node is a member of a distribution list, it is also erased from the distribution list.

When you do not mark the parameter Delete-address, the address specifications for all nicknames (in all cabinets) which have been defined for the external node are deleted; however, the nicknames themselves are not erased. To erase the nicknames completely, you must mark the Delete-address parameter.

Successful termination of Z-ERA74 always results in an END TRANSACTION. You are not able to control transaction handling.

Parameters

Parameter	Format	In	Out	Remarks
Return-code	N2		X	
Cabinet	A8	R		The cabinet ID of a supervisor or system administrator.
Password	A8	R		The password of the above cabinet.
Node-name	A8	R		The name of the node to be deleted.
Delete-address	A1	O		If marked, all nicknames defined for the external node are erased.

Return Codes

00	Success
02	Invalid cabinet name
03	Password incorrect
90	User is not a system administrator or supervisor
93	Node does not exist
