Description

File a folder (Source-folder) in another folder (Target-folder), or remove a folder (Source-folder) from the folder in which it is stored.

You can specify a folder by either its name or its number. You must not specify both. To get the numbers for the source and target folders, you can either invoke Z-ADD13 or Z-DIS13A prior to this subprogram.

To file the Source-folder in the Target-folder, you must specify either the parameter Target-folder-name or the parameter Target-folder-number. You must not specify both parameters.

To remove the Source-folder from the folder in which it is stored, you must leave the parameters Target-folder-number and Target-folder-name blank. In this case, the Source-folder becomes a separate folder which is not filed within any other folder.

Lower hierarchy is not allowed when filing folders into other folders. For example, folder A is filed in folder B and folder B is filed in folder C. Folder C can be filed in another folder but it cannot be filed in folder A or B.

A TRS folder cannot be used as a source or a target folder.
