Description

Return an object which is contained in a specific bulletin board.

This subprogram requires that you specify the ISN of the wanted object. To get the ISN, you must first invoke Z-DIS04A.

When you leave the parameter *All-objects* blank, an object other than a document is ignored. In this case, the document text, including cover notes and enclosed documents, is returned in the parameter *Text-array*.

When you mark the parameter *All-objects*, an object other than a document (for example, a reference document or application) is also returned. In this case, only the cover note of the object is returned in the parameter *Text-array*.

This subprogram should be invoked iteratively until the return code 77 indicates the end of text. The type of text which is currently being processed is returned by the parameter *Text-type*.
