

# Con-nect Installation and Operations

This documentation provides information on installing and operating Con-nect in various operating system environments and under various TP monitors. It also describes how to install the Con-nect transport service used by Con-nect to send and receive mail items to/from other Con-nect nodes or mailing systems and how to install Con-nect Text Retrieval. Additionally, this manual describes how to install the Con-nect selectable units Con-nect Teleservices and Con-nect SNADS.

It is divided into the following parts:

●	Part 1. Installing Con-nect	Describes the procedures required to install Con-nect on the various operating systems.
●	Part 2. Installing the Transport Service	Describes the procedures required to install the Con-nect transport service on the various operating systems.
●	Part 3. Installing Con-nect Teleservices	Describes the procedures required to install Con-nect Teleservices.
●	Part 4. Installing Con-nect SNADS	Describes the procedures required to install Con-nect SNADS.
