

# Installation

This section provides the following information:

- Installation Prerequisites
  - Prerequisites for Reading the Online Documentation
- 

## Installation Prerequisites

Con-nect is a subsystem of Natural. Con-nect/Con-form Version 3.4.1, Con-nect Teleservices Version 2.6.1, and Con-nect SNADS Version 1.5.1 are compatible with Natural Version 4.1.2 or above.

Adabas must be installed so that it is possible to display the documents in a cabinet in descending alphabetical order (i.e. page backwards). The required Adabas version is dependent upon the Natural version running on your system. For further information, see the Natural documentation.

The prerequisites for Con-nect are listed in *General Information for Con-nect* in the *Con-nect Installation and Operations* documentation.

The prerequisites for Con-form are listed in *General Information* in the *Con-form Installation* documentation.

## Prerequisites for Reading the Online Documentation

<b>HTML Browser</b>	<p>For viewing the online documentation, a browser capable of supporting Java, JavaScript, and Cascading Style Sheets is recommended. The documentation has been successfully tested with these products:</p> <ul style="list-style-type: none"> <li>● Microsoft Internet Explorer version 5.x or 6.x.</li> <li>● Mozilla version 1.4.</li> </ul> <p>Both browsers are freely available for download.</p>
<b>Java Browser Plugin</b>	<p>The documentation has been successfully tested with the following browser plugins:</p> <ul style="list-style-type: none"> <li>● <ul style="list-style-type: none"> <li>Sun JVM 1.4.1_01</li> <li>Sun JVM 1.4.2_01, 1.4.2_02, 1.4.2_03</li> <li>There have been problems with the online documentation when using Sun's JVM 1.4.0 as the browser plugin.</li> </ul> </li> <li>● <ul style="list-style-type: none"> <li>Microsoft Java Virtual Machine 5.0.0.3810</li> </ul> </li> </ul> <p>If you use the Microsoft JVM then we recommend the Java Virtual Machine 5.0.0.3810. If you are using an older version of the Microsoft JVM, we strongly recommend you to upgrade it in order to avoid problems (such as the full-text search hanging up). By upgrading you also benefit from Microsoft's latest security enhancements. If you want to upgrade your Microsoft Virtual Machine please visit the Microsoft web site (<a href="http://www.microsoft.com/">http://www.microsoft.com/</a>).</p> <p>For Windows XP and Windows Server 2003 users we recommend going to <a href="http://java.com/">http://java.com/</a> to acquire a free Java browser plugin.</p>
<b>PDF Reader</b>	<p>For viewing the PDF documentation:</p> <ul style="list-style-type: none"> <li>● Adobe Reader</li> </ul> <p>The Adobe Reader is freely available for download.</p>
