

# Print Cabinet Functions

This chapter covers the following topics:

- Description
- Procedure
- Batch Example

## Description

### Program

B07051

### Function

Print a list of cabinets in alphabetical order by cabinet ID. The selected function(s) and criterion (list authorized or unauthorized cabinets) selected determine which cabinets are included in the output. Each cabinet which fulfills at least one requirement is included. The output consists of each cabinet's ID and full name, and the function(s) selected. The functions are then marked with either a Y (authorized) or N (unauthorized), depending upon the criterion selected.

### Online Input Screen

## Utility Parameters

Parameter	Format	Description
Cabinet Maintenance	A1	
System Maintenance	A1	
Command Prompting	A1	
Con-form	A1	
Text Retrieval (TRS)	A1	
Modify Own Address	A1	
Display Home Address	A1	
Send External Mail	A1	
Modify Expiration Date	A1	
Read Mail	A1	
List Authorized Cabinets	A1	
List Unauthorized Cabinets	A1	
Create a Document	A1	Optional

## Procedure

One or more functions and criterion can be selected to determine which cabinets are to be sorted for output.

The authorization for the selected functions is checked for each cabinet. Each cabinet which fulfills at least one of the requirements is included in the output and the column for that function is marked with a Y or N, depending upon the criterion selected.

The column for a function may remain blank if several functions and only one criterion are selected, since a cabinet need not fulfill all requirements to be included in the output.

As default, the output is directed to your defined printer, however, the output can be sent to your cabinet as a document with the name "LstCabFct *Date Time*" (date and time the document is created).

For example, if the functions System Maintenance and Cabinet Maintenance are selected along with the criterion to list all authorized cabinets, only those cabinets which are authorized to perform System Maintenance and/or Cabinet Maintenance are included in the output. In this case, if a cabinet is permitted one or both functions, the corresponding column(s) is marked with a Y for that cabinet. The total number of cabinets included in the output is displayed at the end of the output.

## Batch Example

Create a document which lists all cabinets with the functions System Maintenance and/or Text Retrieval.  
This would be coded as follows:

```
LOGON SYSCNT2B  
MENU  
B07051 ,X,,X,,,,,X,,X  
FIN
```
