

Fix Corrupted Document Records

This chapter covers the following topics:

- Description
 - Output
 - Batch Example
-

Description

Program

B99110

Function

Check all documents in the specified cabinet(s) and, if appropriate, perform the following:

- Invalid date and time fields are corrected (e.g. if the date field contains 0).
- If an object is not contained in a folder or it is contained in a non-existent folder, it is filed into folder Work.
- The pointer for a suspended mail item is corrected, if the copy of the mail item has not been placed in the Outbasket.
- Keywords entered in lowercase are converted to uppercase.
- Document names which were incorrectly converted from lowercase to uppercase are corrected.
- Corrupted bulletin board items that were previously filed in folder Work when this utility was run are filed in folder A-RECOVER in cabinet SYSCNT.
