

Fix Corrupted Objects

This chapter covers the following topics:

- Description
 - Output
 - Batch Example
-

Description

Program

B99131

Function

Check all objects in the specified cabinet(s) and folder(s), except for the following:

- cabinets (cabinets are checked and fixed with utility B99050)
- addresses (addresses are checked and fixed with utility B99010)
- folders/files (folders/files are checked and fixed with utility B99130)
- PF-keys (PF-keys are checked and fixed with utility B99220)

If appropriate, perform the following:

- correct invalid date and time fields (e.g. if the date field contains 0).
- convert keywords entered in lowercase to uppercase.
- correct object names that were incorrectly converted from lowercase to uppercase.
