

# User Application in Main Menu

This subsection covers the following topics:

- Invoking the User Application in Main Menu Screen
- Field Descriptions: User Application in Main Menu

## Invoking the User Application in Main Menu Screen

This function allows you to invoke a user-defined Natural application from the Entire Operations Main Menu.

If you mark the User Application in Menu field on the Default Setting (1) screen and press Enter, the following screen appears:

```

20.11.01          *** Entire Operations ***          17:35:18
                User Application in Main Menu
-----
Application ==> SYSMAIN_
Menu Text   ==> syemain_

The application must be callable from the Entire Operations environment.
By default, the program MENU will be invoked.
The application must return to Entire Operations with the Natural command RETURN.
Example: RELEASE STACK ; STACK TOP COMMAND 'RETURN'

Enter-PF1---PF2---PF3---PF4---PF5---PF6---PF7---PF8---PF9---PF10--PF11--PF12---
      Help      End      Save
    
```

## Field Descriptions: User Application in Main Menu

Field	Meaning
Application	Enter the name of the Natural application. It must be accessible from the Entire Operations environment and a program MENU must exist. The application must be defined in Natural Security and must pass back control with the Natural command RETURN. See also the example on the screen.
Menu Text	The text you enter here will appear on the Entire Operations Main Menu beneath the heading Applications on the right-hand side of the screen.
