

# Reporting Facility

The Reporting facility provided by Entire Operations is designed to help you define entities, monitor the system and plan workloads.

The following reports are available:

- **Log - Terminated Jobs**  
Lists all jobs which terminated within a given date range;
- **Log - Abended Jobs**  
Lists all jobs within a given date range which terminated Not OK;
- **Log - Jobs not Started**  
Lists all jobs within a selected time range which were not started. These are jobs, for example, which exceeded their latest start time or which were waiting for input conditions.
- **Accounting Data**  
Provides information on job elapsed times and CPU times of previous network executions;
- **Network Description (short)**  
Displays the components of the specified job network, including input conditions, schedules and end-of-job checking and actions;
- **Network Description (detailed)**  
Displays the same information as the short network description, but includes a text description of the network (see the following subsection);
- **Network Job Flow Display**  
Provides short overview of job flow within a network.  
Output can be sent to a designated printer;
- **Jobs Schedule**  
Displays schedule of all jobs for a specified date range;
- **Network Activation Summary**  
Produces a status report of all network activations for a given day.
- **Network Schedule Overview**  
Provides an overview of all scheduled network activations.

See the section Reporting for further details.
