

Network Maintenance

This section tells you how to define and maintain job networks. For information on all definitions made at the job and event level, see the section Job Maintenance.

It covers the following topics:

- How to Invoke the Network Maintenance Facility
- Selecting Range of Networks to be Listed
- Adding a Job Network Definition
- Modifying a Job Network Definition
- Network Defaults: Operating System-Specific Entries
- Network Defaults for BS2000/OSD
- Network Defaults for OS/390
- Network Defaults for UNIX and Windows
- Network Defaults for SAP R/3
- Applying Network Defaults to Jobs
- Specifying Recipients for Network Messages
- Listing Active Jobs for a Network
- Copying a Job Network Definition
- Deleting a Job Network
- Displaying Overview of Job Flow within a Network
- Authorizing Other Users to Access a Network
- Checking for a Loop in a Job Network
- Listing Jobs
- Deactivating Active Jobs
- Creating Online Documentation for a Network
- Activating a Job Network Manually
- Display Network Accounting Data
- Symbol Prompting during Manual Activation
- Symbol Prompting User Routine
