

List Jobs in Subnetwork

(Master and Active)

If a master or active job has the type NET, you can invoke the the master or active job list of the defined subnetwork directly.

 **To view the job list of the subnetwork**

- Type **Z** in the line command input field of the selected job in the Job Maintenance screen or Active Jobs screen and press Enter.

The master or active job list of the subnetwork will open.

Note:

If you leave the subnetwork job list with PF3, you will return to the calling network list.
