

# Deleting an Event Definition

## To delete an event definition

1. Type **D** in the line command field of the selected event in the End-of-Job Checking and Actions screen.  
Press Enter.

A window opens in which Entire Operations asks you to confirm the deletion by entering the event name.

2. Press Enter to perform the deletion and close the window.

**Note:**

The **D** line command is available only at the event level.

Deletion of an event also deletes all associated definitions made via the End-of-Job Checking and Actions screen (action for the event, etc.).
