

# Resubmit Job after Re-generation of JCL

This subsection covers the following topics:

- Resubmitting the Active Job
  - Symbol Prompting on Regeneration of JCL
- 

## Resubmitting the Active Job

After re-generation of the JCL, the active job is **not** automatically restarted.

To resubmit the active job after a re-generation of the JCL, the line command **R** (Resubmit active job) must be entered (see Resubmitting an Active Job).

## Symbol Prompting on Regeneration of JCL

If symbol entry is defined for at least one symbol of the symbol table of the job, the symbol is prompted now. If symbol entry is cancelled, the JCL is not regenerated.

See also the subsection Symbol Prompting in the section Symbols.
