

# HELP

The HELP direct command displays long message text.

Prefixes of message keys:

| Parameter | Description       |
|-----------|-------------------|
| EOR       | Entire Operations |
| NAT       | Natural           |
| other     | BS2000            |

The command format is:

```
HELP [MSG msg-id]
```

where:

| Parameter | Description  |
|-----------|--|
| msg-id    | A 7-character message key of Natural, Entire Operations or BS2000. |

For further information, please see the subsection Online Help Facility in the section Logging on to Entire Operations of the Entire Operations User's Guide.
