

Messages and Codes - EOR0101 - EOR0200

This subsection covers the following topics:

- Displaying a Long Message Text
- Messages EOR0101 - EOR0200 in Numerical Order

Displaying a Long Message Text

▶ To display a long message text

- Use the direct command

HELP MSG <message-code>

Messages EOR0101 - EOR0200 in Numerical Order

Message	Explanation	Action
EOR0101 - Too many Conditions	The internal limit for the number of conditions has been reached.	Try to split the usage of conditions with intermediate dummy jobs.
EOR0102 - Invalid Condition Reference	The format of the Condition Reference is wrong.	Please use the field level help to inquire the valid reference formats.
EOR0103 - Impossible for external conditions	The function is available only for conditions of the same owner and same network.	Use a local condition for this function.
EOR0104 - Termination Code not available for:1:	The selected termination code is not available for this operating system.	Please use the help to get a list of the valid termination codes.
EOR0105 - Function not possible for this job status	The selected function can not be executed due to the current job status. Example: A terminated job can no longer be cancelled.	
EOR0110 -:1:Error::2:	A called subprogram returned an error message.	Check the meaning of the message, or contact SAG support.
EOR0121 - Condition:1:is set already	Information only	
EOR0122 - Condition:1:is reset already	Information only	
EOR0131 - Too many Resources	The maximum number of defineable resources for a job is exceeded.	Reduce the number of resources, or use a dummy job to 'collect' the resources.

EOR0132 - Invalid Step Name	The step name field may either contain a simple step name in the OS/390 naming conventions, or a procedure name concatenated with a step name, in the format <procname>.<stepname> Example: PROC1.STEP1	
EOR0150 - Copy to same item impossible	It is not possible to copy an item to itself.	Enter a different item as copy target.
EOR0151 - Alternate System File not defined	You tried to copy from the alternate Entire Operations system file, but it had not been defined in the Entire Operations defaults.	Use the 'Entire Operations defaults' to define the alternate system file.
EOR0152 - Old Object must be deleted first	The 'Copy' function has been invoked for an existing object. This object must be deleted explicitly, before a new one is copied into it's place.	Delete the old object first, or use the 'Copy' function directly after 'Add'.
EOR0153 - One Selection obligatory	One of the selectable alternatives must be marked.	Correct error.
EOR0154 - Invalid hexadecimal String	A valid hexadecimal string is expected in this field. For BS2000, a hexadecimal string is expected after X' only.	Correct error.
EOR0159 - Invalid Range	This message is issued if the start value is greater than the end value.	Correct range.
EOR0160 - Range is:1:thru:2:	This field may only have a value between :1: and :2:.	Correct the field.
EOR0161 - Invalid Run Number Range	- The highest run number must not exceed 9999. - The range begin must not be higher than the range end.	Correct error.
EOR0162 - Invalid Position for Period	The position - must not be zero - must be in the range -7 ... -1 / +1 ... +7 for a week - must be in the range -31 ... -1 / +1 ... +31 for a month - must be in the range -366 ... -1 / +1 ... +366 for a year	Correct error.
EOR0163 - Invalid Special Type	Please use the field-level help to obtain the valid field contents.	Correct error.
EOR0164 - Deadline must be >= Latest Start	The deadline time must not be smaller than the latest start time or earliest start time.	Correct field value.
EOR0169 - Invalid Library Name	The library name entered is invalid.	Enter a valid library name.
EOR0170 - Field must be positive	The field entered must have a positive value.	Correct error.
EOR0199 - Object not in selected Range	The object is not in the selected range. It will be rejected.	
EOR0200 - Object added	The entered object was added.
