

Note about Command Syntax Symbols

The following symbols are used in the description of command syntax:

Symbol	Name	Meaning
[]	Square brackets	Enclosed elements are optional.
{ }	Braces	Only one of the enclosed elements can be specified.
[{ }]		Enclosed elements are optional, but if you do make a selection, only one element may be specified.
;	Semicolon	Assumed command delimiter when entering multiple commands (see your user profile).
_	Underscore	Marks the shortest possible command abbreviation. A command not underlined has no abbreviation.

Note:

Do not type in brackets or braces as part of the command input.
