

Natural Nucleus Error Messages

NAT0851-NAT0900

NAT0851: Error program :1: cannot be found.

Text	Error program ... cannot be found.
Expl.	The error program specified - either in the security profile of the library used or with the parameter ETA - cannot be found, neither in the library itself nor in any steplib.
Actn.	Contact your Natural Security administrator.

NAT0852: Incomplete security profile; call security administrator.

Text	Incomplete security profile; call security administrator.
Expl.	Either you are defined to Natural Security as a user of type MEMBER. Users of this type must be contained in at least one group. You have not been added to any group, or your user type should be changed. Or your terminal is defined to Natural Security, but is not contained in any group.
Actn.	Contact your Natural Security administrator.

NAT0853: Logon accepted to library :1:. This library is empty.

Text	Logon accepted to library This library is empty.
Actn.	No action required.

NAT0854: Logon accepted to library :1:.

Text	Logon accepted to library
Actn.	No action required.

NAT0855: New password must be at least :1: characters long.

Text	New password must be at least ... characters long.
Expl.	Natural Security requires that passwords have a minimum length.
Actn.	Choose a longer password.

NAT0856: Automatic logon with invalid logon data; logon failed.

Text	Automatic logon with invalid logon data; logon failed.
Actn.	Contact your Natural Security administrator.

NAT0857: This user is currently locked.

Text	This user is currently locked.
Actn.	Contact your Natural Security administrator.

NAT0858: Format of expiration date must be as in top right corner.

Text	Format of expiration date must be as in top right corner.
Expl.	The expiration date for a mailbox must be entered in the same format as the date displayed in the top righthand corner of the screen.
Actn.	Enter valid expiration date in valid format.

NAT0859: Expiration date may not be a date in the past.

Text	Expiration date may not be a date in the past.
Actn.	Enter a valid date.

NAT0860: Invalid code.

Text	Invalid code.
Actn.	Enter valid code.

NAT0861: User has no special link to library.

Text	User has no special link to library.
Actn.	Contact your Natural Security administrator.

NAT0862: This Natural session is not under Natural Security.

Text	This Natural session is not under Natural Security.
Expl.	In order to perform the desired function, your Natural session must be running under Natural Security.
Actn.	Invoke Natural under Natural Security (ask your Natural administrator if necessary) before you perform the desired function. If Natural Security is not installed, that function is not available.

NAT0863: Logon to this library not allowed via link ID ':1:'.

Text	Logon to this library not allowed via link ID '...'
Actn.	Log on with a valid user ID; contact your Natural Security administrator if necessary.

NAT0864: No. Lib. ID Library Name*Type*Linked via*Spec.

Text	No. Lib. ID Library Name*Type*Linked via*Spec.
Expl.	Text displayed by Natural Security.

NAT0865: Invalid security file. Please contact your DBA.

Text	Invalid security file. Please contact your DBA.
Actn.	Contact your database administrator.

NAT0866: Your Natural nucleus is not a Natural Security nucleus.

Text	Your Natural nucleus is not a Natural Security nucleus.
Expl.	There is an inconsistency between your Natural nucleus and your Natural system file (FNAT). The nucleus is marked as non-Security, but the Natural system file contains Natural Security-specific programs. Possible reasons for this inconsistency are: - the nucleus has been illegally zapped. - the Natural master control record has been illegally zapped. - the Natural Security NATLOAD has not been performed successfully.
Actn.	Contact your Natural administrator. Repeat the NATLOAD for Natural, and - if your system is a Natural Security one - also repeat the NATLOAD for Natural Security.

NAT0867: Mailbox does not exist / not assigned to your environment.

Text	Mailbox does not exist / not assigned to your environment.
Actn.	Choose another mailbox ID; or contact your Natural Security administrator.

NAT0868: The expiration date of mailbox :1: is already reached.

Text	The expiration date of mailbox ... is already reached.
Actn.	If necessary, change the expiration date.

NAT0869: The file security record has been directly manipulated.

Text	The file security record has been directly manipulated.
Actn.	Contact your Natural Security administrator.

NAT0870: Upload is not permitted.

Text	Upload is not permitted.
Actn.	Contact your Natural Security administrator.

NAT0871: Download is not permitted.

Text	Download is not permitted.
Actn.	Contact your Natural Security administrator.

NAT0872: Invalid function code.

Text	Invalid function code.
Actn.	Enter valid function code.

NAT0873: User ID or password invalid.

Text	User ID or password invalid.
Actn.	Enter correct user ID and correct password.

NAT0874: Press ENTER for next page, or "." to terminate session.

Text	Press ENTER for next page, or "." to terminate session.
------	---

NAT0875: This user is currently not active.

Text	This user is currently not active.
Actn.	Contact your Natural Security administrator.

NAT0876: New password is not valid. Please try again.

Text	New password is not valid. Please try again.
Expl.	The new password was denied for one of the following reasons: 1) New password has too much similarity to previous passwords. 2) New password does not conform to rules for passwords.
Actn.	Contact your Natural Security administrator.

NAT0877: Utility access denied by Security. Please contact your DBA.**NAT0878: Assigned group :1: is currently not active.**

Text	Assigned group :1: is currently not active.
Expl.	The above-mentioned group contains a date which marks the group as currently inactive.
Actn.	Contact your Natural Security administrator.

NAT0879: No active group assigned.

Text	No active group assigned.
Expl.	The user is not assigned to a group with a valid activation date.
Actn.	Contact your Natural Security administrator.

NAT0880: More than 10 syntax errors occurred in BATCH compile.

Text	More than 10 syntax errors occurred in BATCH compile.
Actn.	Correct syntax errors and re-compile.

NAT0881: During compilation, the internal :1: table exceeds :2: maximum.

Text	During compilation, the internal :1: table exceeds :2: maximum.
Expl.	During compilation of a program, various tables are generated to build the object. One of these tables exceeds its maximum size. Identification list: GPT - Generated program buffer KST - Constant buffer MPT - Array structure buffer RNM - SQL generation buffer SBT - Database access buffer VAT - SQL generation buffer VDT - Variable access buffer
Actn.	According to the buffer identification, the program must be reduced in size.

NAT0882: Response code :1: received from dump formatting routine.

Text	Response code ... received from dump formatting routine.
Expl.	The response codes from the dump formatting routine are: 1 - No LFILE definition for LFILE 215 found. 2 - GETMAIN error: no free storage available or address of GETMAIN routine not found. 3nnn - NDA received Adabas response code 'nnn'. 4 - The file which should receive the dump has not been correctly initialized. 5 - The address of Adabas is not valid or not available. 6 - The DB which contains the file where the dump is to be written to is not an Adabas DB. 7 - All available dumps are in use. They are either locked or they may not be overwritten due to the specified retention period. 8 - Error when trying to chain/unchain a save area. 9 - The FREEMAIN call failed.
Actn.	9 - The FREEMAIN call failed. Response codes 1, 3nnn, 4, 6 and 7 may be caused by an installation error. Verify that your installation is correct. In all other cases, please contact Software AG Technical Support.

NAT0883: Source code of an INCLUDE member exceeds 32 KB.

Text	Source code of an INCLUDE member exceeds 32 KB.
Expl.	The source code of an INCLUDE member must not exceed 32 KB.
Actn.	Reduce source code of INCLUDE member or split it into different members.

NAT0884: Internal error, save area chain destroyed.

Text	Internal error, save area chain destroyed.
Expl.	The relocatable save area in Natural is destroyed. Natural resets the chain and restarts. Natural always tests the correct chains of its save areas. The error is caused by a wrong register 13, a save area overflow, or a wrong relocated user area. One reason for a save area overflow may be too many recursive program calls.
Actn.	Natural corrects automatically and restarts. If need be, reduce the number of recursive program calls.

NAT0885: Internal error, I/O buffer overwritten.

Text	Internal error, I/O buffer overwritten.
Expl.	The buffer area that is used to generate output to the screen/printer is also used for other purposes. A condition has arisen where the contents of this I/O buffer have been destroyed, and the buffer has not been re-initialized.
Actn.	Note down the command sequence and contact your Natural administrator.

NAT0886: Storage overflow in extended buffer.

Text	Storage overflow in extended buffer.
Expl.	Certain tables during processing and compilation of Natural programs are stored in the extended buffer. The size of the extended buffer is defined by the Natural administrator with the ESIZE parameter. This error may also be caused by an attempt to write too many data to the Natural stack.
Actn.	Reduce size of source program, or contact your Natural administrator.

NAT0887: Internal stack overflow.

Text	Internal stack overflow.
Expl.	During a stack operation into the runtime buffer a table overflow occurred. This situation should never occur and is probably caused by an (incorrect) excessive store in a runtime buffer table.
Actn.	Ask your Natural administrator to increase the RUNSIZE parameter; if problem persists, contact Software AG Natural support.

NAT0888: Storage overflow during compilation or execution.

Text	Storage overflow during compilation or execution.
Expl.	This error is caused by an overflow of the USIZE or DATSIZE buffer. - At compilation time, this error is due to the USIZE not being large enough to hold all tables required to create an object module from the respective program. - At execution time, this error is due to too many nested object calls. Use the command LIST DIR to ascertain the DATSIZE requirements of the individual objects being called. See also Natural Operations documentation for details on USIZE and DATSIZE parameters.
Actn.	Ask your Natural administrator to increase the USIZE or DATSIZE buffer; or reduce the size of the program being compiled, or reduce the number of nested object calls at execution.

NAT0889: Generated program table overflow.

Text	Generated program table overflow.
Expl.	The table that contains the generated program has overflowed during compilation of the program.
Actn.	Reduce the size of the program. Use fewer database calls. If problem persists, contact the Natural Administrator.

NAT0890: Invalid source parameter construction.

Text	Invalid source parameter construction.
Expl.	A possible cause for the error is the construction of a parameter source notation within another source parameter. Natural supports only one level of parameter source processing.
Actn.	Check program and correct error.

NAT0891: Natural symbol table exceeds maximum size of 512K.

Text	Natural symbol table exceeds maximum size of 512K.
Expl.	During compilation, symbols in a program are covered in a buffer, called symbol table (SYT). The maximum size of the SYT (512K) overflows.
Actn.	Reduce the number of variables in the program and recompile.

NAT0892: Maximum size of symbol table (60 KB) has been reached.

Text	Maximum size of symbol table (60 KB) has been reached.
Expl.	The program uses more/longer symbols (variable names, subroutine names, etc.) than fit into the symbol table. The maximum possible size of the symbol table has been reached.
Actn.	Decrease the number of symbols used (for example, by using several smaller programs instead of one very large program).

NAT0893: Not enough memory for machine code compilation.

Text	Not enough memory for machine code compilation.
Expl.	The machine code compiler cannot proceed because of shortage of resources. The following area is used: - FSIZE Note that although the object was not stowed in optimized form it was stowed normally.
Actn.	Increase FSIZE and recatalog program.

NAT0899: Internal error in structure of DDM :1:.

Text	Internal error in structure of DDM
Expl.	The DDM was not correctly generated and contains an internal inconsistency.
Actn.	Re-generate the DDM.

NAT0900: Storage overflow while assigning data area.

Text	Storage overflow while assigning data area.
Expl.	The storage area that contains the data area for the program overflowed during address assignment for data fields. or: There are more than 50 external subroutines referenced in the program. or: There was an overflow while composing an executable object.
Actn.	Reduce the data areas in the program or use fewer database fields or increase the DATSIZE profile parameter and restart the session.
