

# Introduction to Review Natural Monitor

## What is Review Natural Monitor?

Review Natural Monitor is a monitoring facility that provides response time and user activity information about Natural applications running under the TP monitor CICS. The product includes a User Profile System which is an administrative facility used for defining access privileges to Review.

## New Features and Enhancements

The following new features and enhancements are available with the current version of Review Natural Monitor:

- User interface like that of Natural Version 3.1.
- Runs stand-alone in library SYSRNM.  
Can no longer be called from the old Review Menu of SYSREV used in Review Natural Monitor Version 3.5.

## Prerequisite

Review Natural Monitor Version 3.6.1 requires Natural for Mainframes Version 3.1.4.
