

BATCH - Batch Mode Simulation

This Natural profile parameter is for UNIX and Windows platforms only.

It sets the system variable *DEVICE to "BATCH" when Natural is started.

Possible settings	ON	When Natural is started with profile parameter BATCH set, error messages are not displayed, but written to a log file. The log file is named "natbatch.log" and is located in the Natural binary directory.
Default setting	OFF	Error messages are displayed but not written to a log file.
Dynamic specification	YES	This parameter can only be specified dynamically.
Specification within session	NO	

To run Natural in real batch mode, use the parameter BATCHMODE instead of BATCH.
