

# BATCHMODE - Real Batch Mode

This Natural profile parameter is for UNIX and Windows platforms and applies to batch mode only.

It enables real batch mode and sets the system variable \*DEVICE to "BATCH" when Natural is started.

<b>Possible settings</b>	ON	Natural will run in batch mode.
<b>Default setting</b>	OFF	Natural will run in interactive mode, or in batch mode simulation.
<b>Dynamic specification</b>	YES	The parameter can only be specified dynamically.
<b>Specification within session</b>	NO
