

CMPRTnn - Additional Report

This Natural profile parameter is for UNIX and Windows. It applies to batch mode only.

It is used for additional reports referenced by any Natural program executed during the session. "nn" is a two digit decimal number in the range from 01 to 31 corresponding to the report number used in a DISPLAY, PRINT and WRITE statement.

Possible settings	any string	Example for UNIX: CMPRT07 = \$HOME/tmp/report7.txt Example for Windows: CMPRT07=C:\tmp\report7.txt
Default setting	none	
Dynamic specification	YES	
Specification within session	NO
