

DUE - Dump for Specific Errors

This Natural profile parameter is for mainframes only.

This parameter allows you to specify Natural error numbers for which a storage dump shall be taken. This may be helpful to get a dump for the analysis of a specific error situation by Software AG personnel.

Possible settings	List of numbers 1-9999	One or more error numbers for which a dump shall be taken. If DUE is specified multiple times, all error numbers are saved in one table.
	OFF	Deletes the table and any error numbers specified previously are removed.
Default setting	OFF	
Dynamic specification	YES	
Specification within session	YES	Terminal command %DUE

If an error occurs which has been specified by DUE, a program check is forced. If the profile/session parameter DU=OFF is set, it will be changed to DU=ON. For further processing, the DU parameter setting is honored.

Examples:

```
DUE=1302
DUE=(6501,6502,6503,1500)
DUE=OFF
```
