

ENDMSG - Display Session-End Message

This Natural profile parameter is for:

- Mainframes
- UNIX and Windows (in batch mode only)

By default, message NAT9995 is displayed at the end of the Natural session, indicating that the Natural session has been ended normally. With this parameter, you can suppress the display of this message.

Possible settings	ON	Message NAT9995 will be displayed at the end of the session.
	OFF	Message NAT9995 will not be displayed at the end of the session.
Default setting	ON	
Dynamic specification	YES	
Specification within session	NO	

If a session back-end program is defined with the profile parameter PROGRAM, the ENDMMSG profile parameter has no effect; the message text will then be passed to the back-end program in the parameter area and will not be displayed by Natural.
