

ETDB - Database for Transaction Data

This Natural profile parameter is for:

- Mainframes
- UNIX and Windows

It specifies the database in which transaction data, as supplied with an END TRANSACTION statement is to be stored.

Possible settings	1 - 65535, except 255	Database ID. Database ID 255 is reserved for logical system files for Software AG products, see profile parameter LFILE.)
	0	The transaction data are written to the database where the Natural Security system file (FSEC) is located. If FSEC is not specified, it is considered to be identical to the Natural system file FNAT (if Natural Security is not installed, the transaction data are written to the database where FNAT is located.
Default setting	0
