

# GFID - Global Format IDs

This Natural profile parameter is for UNIX and Windows platforms only.

It allows you to control Natural's internal generation of global format IDs so as to influence Adabas's performance concerning the re-usability of format buffer translations.

<b>Possible settings</b>	ON	Global format IDs are generated for all views.
	OFF	Global format IDs are not generated.
	VID	Global format IDs are generated only for views in local/global data areas, but not for views defined within programs.
<b>Default setting</b>	ON	
<b>Dynamic specification</b>	YES	
<b>Specification within session</b>		

For details on global format IDs, see the Adabas documentation.
