

SF - Spacing Factor

This Natural profile and session parameter is for all platforms.

It specifies the default number of spaces to be inserted between field settings of columns on Natural reports created using a DISPLAY statement.

Within a Natural session, the profile parameter SF can be overridden by the session parameter SF.

Possible settings	1 - 30	Number of spaces. The SF parameter cannot be set to "0"; that is, at least one blank character must be placed between report columns.	
Default setting	1		
Dynamic specification	YES		
Specification within session	YES	Applicable Statements:	SET GLOBALS
		Applicable Command:	GLOBALS

For details on session parameter specification at statement or element level and evaluation at compilation time or at runtime, refer to Session Parameter Specification/Evaluation Overview.
