

SORTSIZE - Size of Sort Buffer

This Natural profile parameter is for UNIX and Windows platforms only.

It indicates the amount of storage to be reserved for use by the sort program. This sort buffer is only allocated when executing a Natural program which contains a SORT statement.

Possible settings	500 - 2048	Buffer size in KB. Increasing the setting leads to faster sort processing, in particular when all data to be sorted fit into the sort buffer.
Default setting	500	
Dynamic specification	YES	
Specification within session	NO
