

# TMODEL - IBM 3270 Terminal Model

This Natural profile parameter is for IBM mainframes only.

**Under CICS**, this parameter is ignored, because the terminal screen size is defined by the CICS terminal control table.

TMODEL controls the IBM 3270 terminal model number for online environments, e.g. under IMS/DC. It is used to determine the number of lines and columns of the terminal screen.

<b>Possible settings</b>	0	The screen size is determined by the environment-dependant driver module. If possible, it gets the screen size information from its subsystem. Otherwise, the definitions of default model 2 are used, e.g. under IMS/DC.
	2	The screen size is 24 lines and 80 columns.
	3	The screen size is 32 lines and 80 columns.
	4	The screen size is 43 lines and 80 columns.
	5	The screen size is 27 lines and 132 columns.
<b>Default setting</b>	0	
<b>Dynamic specification</b>	YES	
<b>Specification within session</b>	NO	

**Note:**

If your TMODEL specification is incompatible with the physical terminal screen size, the output data may be displayed incorrectly or hardware errors may occur.
