

TRACE - Define Trace Level for Natural RPC Servers

For static specification, this parameter is available as a keyword subparameter of the NTRPC macro. For dynamic specification, this parameter is available as a subparameter of the profile parameter RPC.

TRACE activates the RPC trace facility and determines the trace level *n* to be used. For further information, see Using the Server Trace Facility p.p. in the Natural Remote Procedure Call documentation.

Possible settings	0	Nothing is traced.
	1	Only messages (inclusive Natural errors) are traced.
	2	All messages and data from/to client are traced.
Default setting	0	
Dynamic specification	YES	
Specification within session	NO	

The values 3-9 displayed in the selection box are for future use. If one of these values is chosen, then TRACE=2 is selected.
