

LS - Line Size

This Natural profile parameter is for:

- mainframes
- UNIX and Windows

It indicates the maximum number of characters permitted per line for DISPLAY, INPUT, PRINT and WRITE statements. The LS parameter is honored in batch mode only. In online mode, the line size is set to the physical screen width always.

Possible settings	35 - 250, or 0	Maximum number of characters permitted per line. LS=0 indicates that the output device line size is to be used.
Default setting	0	The output device page line size (in most cases 132) is to be used.
Dynamic specification	YES	
Specification within session	YES	Within a Natural session, the profile parameter LS can be overridden by the session parameter LS.
