

# PC - Control of Personal-Computer Access Method

This Natural profile parameter is for:

- mainframes
- UNIX

It only applies if Natural Connection is installed.

This parameter determines whether support of the personal-computer access method is to be provided using Natural Connection.

<b>Possible settings</b>	ON	Personal-computer support is enabled. The Natural statements READ PC FILE and WRITE PC FILE can be used (for uploading and downloading respectively); see UPLOAD PC FILE and DOWNLOAD PC FILE in the Natural Connection documentation.
	OFF	No personal-computer support is to be provided.
	NAM	Field names are sent when data are uploaded/downloaded. This value is for mainframe environments only.
	NONAM	No field names are sent when data are uploaded/downloaded data. This value is for mainframe environments only.
<b>Default setting</b>	OFF	For non-mainframe environments.
	(OFF,NAM)	For mainframe environments.
<b>Dynamic specification</b>	YES	
<b>Specification within session</b>	OFF	In mainframe environments, the terminal commands %+ and %- can be used to control the PC support.

For mainframe environments, multiple values are specified in a value list:

### Example:

```
PC=( ON , NONAM )
```

See the **Natural Connection documentation** for further information.

If PC is set to ON, the system variable \*DEVICE will always contain the value "PC".

The files used for the PC access method have to be defined with the macros NTPRINT and NETWORK or the profile parameters PRINT, WORK and HCAM.
