

ULANG - User Language

This Natural profile parameter is for:

- Mainframes
- UNIX and Windows

It indicates the language to be used for date edit masks, system messages, user messages, helptexts, help routines, and multi-lingual maps. The setting is used to set the Natural system variable "*LANGUAGE".

| | | |
|-------------------------------------|--------|--|
| Possible settings | 1 - 60 | Language code. For example, 1 is assigned to English, 2 is assigned to German, 3 is assigned to French. For a detailed list of language codes, see the table in the documentation of the *LANGUAGE variable. |
| Default setting | 1 | |
| Dynamic specification | YES | |
| Specification within session | NO | |

For additional information about language indicators and possible settings, see Configuration Tables - Module NATCONFIG in the Natural Operations for Mainframes documentation.
