

USIZE - Size of User Buffer

This Natural profile parameter is for UNIX and Windows platforms only.

It indicates the size of the user buffer in virtual memory. The user buffer contains all data dynamically allocated by Natural.

Possible settings	0 or 10 - 1024	Buffer size in MB.
Default setting	10	
Dynamic specification	NO	
Specification within session	NO	

Note:

If USIZE is set to zero, the memory capacity will be unrestricted.
