

# V41MFCOMP - Identify Incompatible MF Version 4.1 Syntax

This Natural profile parameter is for UNIX and Windows platforms only.

It provides a compatibility option for syntax which is currently incompatible with Natural for Mainframes Version 4.1.

**Note:**

The V41MFCOMP option will be available only for a limited period of time in order to identify the incompatibilities. It will be removed again with the next version of Natural.

|                                     |     |  |
|-------------------------------------|-----|--|
| <b>Possible settings</b>            | ON  | At compilation (triggered by the system command CHECK, CAT or RUN), a check takes place for syntax that is not yet available with Natural for Mainframes Version 4.1 (new system functions, X Arrays, etc.). In case an incompatibility with Natural for Mainframes Version 4.1 is detected, a syntax error is returned. |
|                                     | OFF | The compatibility is not checked. No syntax error is returned.   |
| <b>Default setting</b>              | OFF |  |
| <b>Dynamic specification</b>        | YES |  |
| <b>Specification within session</b> | NO  |  |
