

NTDS Macro - ???

An NTDS macro is used to

- NTDS Syntax
 - NTDS Options
 - Examples of NTDS Macros
 - NTDS Alternative
-

NTDB Syntax

An NTDS macro is specified as follows:

NTDS Options

options can be:

???	???
???	
???	

Examples of NTDS Macros

???

NTDS Alternative

To dynamically overwrite NTDS specifications, you can use the dynamic profile parameter DS. With the DS parameter, you can selectively overwrite individual NTDS specifications, without affecting other NTDS specifications.
