

# HELP

The HELP command invokes the Natural Help utility. This command retrieves information on Natural statements, commands, etc., and error messages.

The following options are available with the HELP command:

Option	Function
HELP	Displays the help menu.
HELP <i>statement</i>	Displays help information for the specified <i>statement</i> .
HELP <i>command</i>	Displays help information for the specified <i>command</i> .
HELP [NAT] <i>nnnn</i>	Entering HELP and a number (up to 4 digits, optionally prefixed by "NAT") displays the detailed message text for the Natural error condition associated with that number, that is, the long text of the Natural <i>system</i> error message NAT <i>nnnn</i> .
HELP NAT	Displays information on all error messages.
HELP <u>USER</u> <i>nnnn</i>	Displays the long text of the <i>library-specific</i> error message number <i>nnnn</i> in the current library.
HELP <u>USER</u>	Displays a selection list of <b>all</b> library-specific messages in the current library.
HELP <u>ERROR</u>	Displays the long text for the error that occurred last.
