

SYSADA - ADACALL

This command is for Mainframes only.

SYSADA

This command is used to invoke the ADACALL utility which is contained in the library SYSADA. The ADACALL utility enables you to issue Adabas direct calls (native commands) directly to an Adabas database from mainframe Natural. The ADACALL utility can be used for learning purposes or for testing/analyzing various problems or scenarios.

For further information on ADACALL, see SYSADA Utility ADACALL as described in the Natural Utilities documentation.
