

# SYSEDT

This command is for Mainframes only.

<b>SYSEDT</b>
---------------

This command is used to invoke the Editor Buffer Pool Services utility SYSEDT. SYSEDT is intended for Natural administrators. It is used to do the following:

- display parameters and runtime information concerning the editor buffer pool,
- modify parameters,
- delete logical work and recovery files.

For further information on SYSEDT, see the section SYSEDT Utility as described in the Natural Utilities documentation.
